King Municipal Conteil meets for the appointment of Township officers, and the transection of general business, on Monday next, the 9th fast, at the Village of Kentleby.

Some of our friends at Lemonville have requested us to correct a fales impression in regard to the School-controversy between Mr. Wm. Young and Mr. Adam Hastings, also referred to by Dr. Pyne. The School is not Lemonville, but located in the 6th Concession, about two miles from that place.

The Lecture delivered last Friday evening, before the Mechanic's Institute by Mr. J C. Geikie, on Geology, was really an interest-With ideas sublime, and excellent descriptive language, he seemed to completely fascinate his hearers. Considering the state of the reads there was a large attendance.

Tio Labrarian of the Mechanics' Instifute requests us to acknowledge the receipt of a rolume of "Transactions of the Board of Agriculture"- presented by the County Board, through Col. Beresford. Also, copies of late English papers from the President of the Institale, to the Reading Room.

The Governor's Speech. Take many of our contemporaries, we have failed to discover in His Excellency's Speech. delivered at the opening of the present Session of Parliament, searcely anything really deserving of public commendation. As on the last previous occasion, a considerable portion of the document relates to past transactions-telling the Legislature of things and circumstanper is taken, leading offe to suppose His Excellency had been keeping a diary of the facts he had seen recorded in that inestimable journal'so liberally supplied to unlighten Europe in regard to this Canada by the Hon. Philip Van- Weevil. The Midistry, too, during the seven months' recess appear to have been wrapt up in a state of somnambulism and just awakened to consciousness. The lure of office must have held them under a state of hallucination, and so blinded their perceptive faculties as to redder everything going on around them a perfect blank. Listen to their wild exclamations, as expressed through His Excellency's Speech, just as the scales appear to be falling from their eyes-"among the outward signs of progress, the opening of the Grand Trunk hold a prominent place!" What a magniloquent idea! and with what singular and fixedness of purposes it must have been charished! "When he cometh into the world materially retarded operations in repairing the he saith, sacrifice and offering thou wouldst not, but a body hast thou prepared me, then said I, (in the volume of the book it is written of me) i" So I come to do thy will O God" and thus it was that Jesus " proceeded forth from the Father and came into the world to do the will of Him who sent him." Then the word was made flesh and dwelt among us, and we beheld his glory, "the glory as of the only begolfen of the Father, full of grace"and thus it was, the Son of God, becoming identified with that prepared lody, became the Son of Man-" For as the children were partakers of flesh and blood, he likewise took part of the same, and was thus made in things like unto his brethren, that he might be tempted in all things like as we are; that he might, having suffered by being fempted, be touched with the feelings of our infirmities, and know how to succour them who are temp ed." It is then he who suffered, being tempted, n whom we trust for succour when tempted

My dear Sir .- In reply to your favor of the 19th instant, asking my experience and opinion relative to the virtues of a benumbing agent which is being advertised in your place and elsewhere, I am obliged to say, that I regard its main virtue to consist in the advertising medlum it furnishes to those Quacks who have exhausted every other stratagein to impose upon the public. I have experimented with this " newly invented agent?" (!!!) and which as you are aware is simply a little sack of pounded ice and salt; and have seen the result in the practice of others, till I am fully satisfied that it is most justly entitled to a front

rank among " unmitigated humbugs." The principle upon which the pretence founded is the well known fact that "cold diminishes pain," but while this is admitted, it is of course evident that it must be applied to the part which is the seat or source of hain as regar s any given operation. In the extraction of teeth, these parts are so deeply seated as to be almost wholly unaffected, till this application of salt and ice has produced an injurious, not to say a destructive effect opon other adscent parts of the mouth -- carticularly the surrounding gum. In conclusion I would say ther as an efficient; or harmless means of even has a strong paralyzing effect upon the creulterance in the language of the centurion who dulity of every community, and were this the only evil arising from such base prefensions, it might well be left to its own cure, which would always, bel'effected by a moderate dethus lured into the rooms of these mountebanks and are induced to submit not unfrequently to amount of elasticity as heretofore found in and the awfullness of sin. . Mr. Spence, after come remarks on the importance of the Hudson Bay territory to the Province of Canada, stated that this was not the proper time to lay papers before the house, and he could not understand why any consure should be thrown on the government for the more allusion to the subject in the speech. As to Mr. Justice Draper, the legal replied to by others. But he would content Mr. Justice Draper was not perfectly qual-

Hon. Mr. Cameron spoke at great length, condemning the Government for selecting a mory. Judge for their Commissioner to Englandand delivered a very able and talented speech. Attorney General Macdonald said he had not been prepared for the position taken by the learned member for Toronto. That hon, gentleman commenced his speech by express. ing the greatest friendship for Chief Justice Draper, and then proceeded to make the most grave attacks on him as a lawyer, a judge one a statesman. It was unnecessary for him (the Attorney General) to rindicate Chief Justice Draper from those attacks .- [R ason :- impossible .- Ed. Era But he held that Mr. Dra. per's present appointment could, in po way whatever interfere with his freedom in dealing with any matter that would afterwards come

before him in his capacity as a judge. Mr. Ferguson had pleasure in acknowledg. ing the capacity and honorable professional conduct of Chief Justice Draper; but this was a very different matter from the question of the propriety of the appointment of a Chiel Justice of a Canadian court to a distant mission. After denying the justice of the censure passed by Mr. Macdonald on Mr. Cameron for reflecting on his friend Mr. Draper, that reflection having been made in pursuance to a public duty, he went on to say that none of the precedents quoted by Mr. J. A. Mac. donald had convinced him that the appointment of Mr. Justice Draper was a proper one. As to the promotion of certain judges notes in payment at par. to higher places on the beach, they bad una doubtedly taken place in England; but he did tutions not believe those proportions were good; and the feeling in England was certainly strongly against them; so much so, that go phisne judge was ever allowed to appear at a court feets of their debtors a privileged claim for drawing room, from the time he kissed hands their costs of suit open the property berzed

Mr. Ayllen followed, charging the Opposition with delaying, the business of the House, In reference to Judge Draphe's appointment, he would say, that ordinarily it was wrong to have recourse to Judges - but he thought this case an exception ; and did not believe another man could be found as well capable of unertaking the commission as the gentleman

this same Judge might be called upon to de. thereof, to examine witnesses on oath, cide matters connected with this missionand tantalized the Government with being sunken indeed, when they had to resort to the bench for a man to do their work.

Mr. Brown spoke for more than an hour and a half. His speech was effective and 1. ing, and sometimes eloquent. He noticed many ourissions in the speech from the throne, and argued that the Ministry had stolen from the Opposition the few measures they had put tion for preventing the infraction of the laws

Mr. McKenzie also spoke at great length | against usury. in a style which kept the flouse and the gallery highly amused. Some of his hits were felling enough. He was, he said, an outsider, belonging to neither political party.

After perusing these statistics, we ask the merchants, landed proprietors, and capitalists of Toronto, whether they intend to allow this trade (which they at present possess) to be taken away from this city? The advantages of the extension from Lindsay to Beaverton are thus portrayed in page 9 of the Repord: - In the general features of this railway seveeral decided advaylages peculiar, foit are perceptible. It penetrates the rich agricultural region murth of the centre of Lake Ontario la such a direction as to avoid all competition with any existing line, and also to render the future omstruction of a competing line extremely improbable, and pulpally unnecesserry. Intelligent persons employed in procuring saw logs and he securing timber licenses in this pine region, give the assurance that the removal of twenty millions of feet animally, for twenty years in succession, would exhaust but a small portion of the inmense forests which the numerous Lakes and streams render accessible." If we stated that the above report is based on the apathy of the citizens of l'oronto, we would not be far off the mark. Port Hope is not the only competitor; we have a much more formidable one, on account of the proximity, though also less apathetic than Toronto, namely, Whitby. During the present mouth the Town Council of Whithy have taken stock to the amount of £100 000 in the Whithy and Loke Horon Hailroad. A member for New England thus sold his seat to a New York member for \$100; and this session, being again fortunate in-drawing a good seat, lie sold it again to another New York member for \$50."
